

2019 Alfalfa Quality Test Trial

	1st Cutting	2nd Cutting	3rd Cutting	4th Cutting	5th Cutting
Fertility (application made prior to cutting)	No Fertility	Soil Works Blend	Soil Works Blend	Soil Works Blend (MINUS GSR GROWING)	Soil Works Blend
RFV Results	126	141	165	143	237
ADF Results	29.8	32.02	29.89	33.24	20.88
NDF Results	39.8	41.92	36.78	40.98	28.49
Crude Protein Results	13.9	16.66	23.09	20.62	22.75
TDN Results	53.5	66	67	63	76
Calcium	1.08%	1.13%	1.48%	1.06%	1.25%

****Soil Works Blend** = 45 grams GSR growing, 5 pounds organic sugar, 4 pounds MSR, 4 gallons Fish, 5 gallons bio-5 extract

Location: Hansen Organic Farm - Fremont, NE

Notes: Alfalfa stand was planted in 2018 with no fertility/products applied during that year. One cutting was taken in 2018. The first cutting of 2019 was taken with no fertility applied. Each Soil Works application was applied approximately 10-14 days after each cutting. Each hay analysis was conducted by the grower.
